

SEPARATING PEOPLE FROM HAZARDS

Facility Safety Solutions

Safety Systems For Vehicle Maintenance

Kee Safety: Assessing the Risks Inside your Facility

As workplace safety experts we perform critical analysis inside your facility to identify the hazards where your workers are exposed to the greatest risk. This analysis ensures that the most dangerous areas are protected immediately with proven solutions that meet recognized standards and regulations.

Traffic Shield™
Protecting People from Dangerous Collisions

**Kee Klamp®
Modular Railings**
Easy to Install Compliant Railing for Mezzanines

Kee Platform®
Providing Access without the Risk

Post Shield™
Simple, Effective Way to Eliminate Damage

**Kee Track®
Overhead Rigid Rail**
Fall Protection for Loading and Manufacturing

PitProtect®
Protecting People from Open Voids

Kee Track® Overhead Rigid Rail Fall Protection for Loading and Manufacturing

In many facilities there is a need to access the top of vehicles for maintenance and construction. Kee Track offers dependable safety and short fall arrest distances when loading and working on top of mobile equipment. Fixed to the ceiling with a unique range of mounting options, Kee Track is designed to maintain an open floor plan using structurally-mounted, low-profile rails that maximize work zones.

Kee Platform® Providing Access without the Risk

Kee Platform can be designed to reach complex places with ease. Made from modular Kee Klamp components, access platforms can be designed to suit any task with minimal disruption to existing work processes.

PitProtect® Protecting People from Open Voids

PitProtect is a lightweight inspection pit cover that is easy to open and close. It has been created to safeguard open pits, and designed to be robust, adjustable and quick and easy to deploy. The inspection pit cover protects against falls whilst still giving access to the underside of vehicle.

Traffic Shield™

Protecting People from Dangerous Collisions

When it comes to collisions between vehicles and people, people always lose! Traffic Shield Industrial Safety Barriers are designed to keep people from harm even when drivers make an error. A select set of modular components allow for guardrails to be constructed quickly and easily.

Post Shield™

Simple, Effective Way to Eliminate Damage

Bollards have been around a long time for a reason: they work! Bollards are simple and can be installed just about anywhere to protect just about anything. Bollards are available with added features such as guardrail intermediates.

Kee Klamp® Modular Railing

Easy to Install Compliant Railing for Mezzanines

International regulations specify that any fall distance can pose a serious danger. The safest method of providing protection is separating people from fall hazards with railing. Kee Klamp Modular Railing protects people from falling from mezzanines and other elevated surfaces.
